Why Vanguard MDM?

The first Enterprise Mobility Management Platform with flexibility of customization and integration.

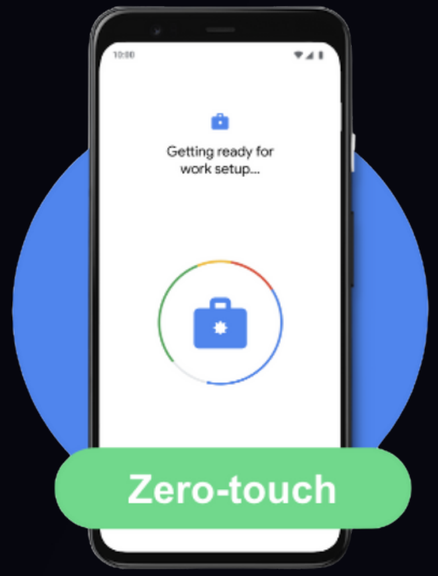
Remote Device | **Support Open API** | **Affordable**

Let's your IT Admin remotely configure many device settings.

Extend Vanguard capability to your system.

Effective and efficient solutions at affordable costs.

Android Zero-touch Enrollment with Vanguard MDM



Zero-touch enrollment is a streamlined process for Android device to be provisioned for enterprise management. Zero-touch enrollment allows IT to deploy company-owned devices in bulk without having to set each one up manually.

Benefits of Zero-touch

Effortless

Automated EMM enrollment and device provisioning at any scale.

Factory Reset Protection

Protect and control your device with zero-touch.

Zero-touch Enrollment Process

Order

Company orders compatible devices from a device reseller partner.

Configure

The reseller creates a customer account within the zero-touch portal or via API, uploads the IMEI(s) of the device(s), then ships the devices to the company.

Deploy

Company admin creates enterprise mobility management configurations that will apply to devices in the zero-touch portal.
